### Select Bourns® Model CC453232, CM322522, PM1210, CM453232 and PM1812 Series Chip Inductors

#### *Change in Source of Supply for Inductor Core*

Riverside, California – November 3, 2022 – In order to support our fast-growing demand and enhance continuity of supply, effective March 12, 2023, Bourns will change its ferrite core material supplier for select Model [CC453232](#), [CM322522](#), [PM1210](#), [CM453232](#) and [PM1812](#) Series Chip Inductors. The new supplier has been qualified and is included in the Bourns Authorized Vendor List.

The material characteristics of the cores from the new supplier are compared to the characteristics of the existing cores in the following table:

Core Characteristics	Existing Source	New Source
Initial Permeability	400 ±25 %	400 ±25 %
Saturation Flux Density (mT)	420	340
Relative Loss Factor (tanδ/μi)	< 50 x 10 <sup>-6</sup>	< 100 x 10 <sup>-6</sup>
Curie Temperature (°C)	> 170	> 200

Users should verify that the described changes will not impact the performance of the product in their specific applications.

IC22104

The form, fit, function, quality, reliability and country of origin of the affected inductors will not change. The change of supplier will not change the data sheet specifications for the affected inductor models. The production lead time of these inductors will remain the same. Traceability will be maintained through lot code and date code.

Samples built using cores from the new supplier are available upon request. Bourns recommends that customers test the affected part number(s) in their specific applications for verification of satisfactory performance.

**Implementation dates are as follows:**

Date that deliveries of products manufactured using cores from the new supplier will begin: **March 12, 2023**  
First date code using cores from the new supplier: **2311**
