

04 January 2012

Dear Customer

We have been advised by Co-Tron that the BNC Bulkhead Jack connector, part number 630032, has undergone the following design change to the press washer. The modification is a design improvement to prevent the buildup of excess plastic material on the Jack during the manufacturing process.

Appearance before the design change

Appearance after the design change

The modification does not effect on the form, fit or function of the connector.

This manufacturing change is with immediate effect on shipments from Co-Tron to Anglia although some stock of the older design still remains. Anglia operates a strict FIFO system in our warehouse facility therefore it may take some time for this change to filter through to customer deliveries.

Please make the relevant person(s) in your purchasing and engineering departments aware of this change to avoid any disruption to your manufacturing.

Yours Sincerely

Anglia
