Product Change Notification for Littelfuse MOSFETE DISCRETE and Discrete IGBT in ISOPlus247, SMPD, ISOPLUS264 and I4PAK

To whom it may concern,

Littelfuse would like to notify you of a change related to Molding Compound Change.

DESCRIPTION OF CHANGE: As previously communicated to our customers, Samsung SDI has decided to exit the EMC material business and as a result we have qualified an alternate molding compound for the packages ISOPlus247, SMPD, ISOPLUS264 and I4PAK, manufactured at our assembly subcon.

Form, fit, function changes: No Fit/Form/Function change with alternative EMC.

Below is the package qualification data for ISOPlus247, SMPD, ISOPLUS264 and I4PAK:

TEST	CONDITION	ENDPOINT	RESULT
HTRB	MIL-STD-750-1 M1038 Method A; 125°C	1000 hours	pass
HTGB	JESD22 A108; 150°C	1000 hours	pass
Temperature Cycle	JESD22-A104 (-55°C to 150°C)	250 Cycles	pass
HAST	JESD22-A110 (130° C, 85% RH)	96 hours	pass
Autoclave	JESD22 A102 (121° C, 100%RH, 15 psig)	96 hours	pass

Shipments with the alternative new molding compound will begin starting with **WW09**.

Please refer to next page for the list of affected part numbers.

If you have any additional questions or concerns, please contact us or your Regional Sales Manager.

Best Regards,

Raymon Zhou
