Notification of changes New production site for ferrite accessories

EPCOS is also increasingly feeling the supply shortage of raw materials such as steel and plastics as well as the associated strong rise in their prices. These materials are also used to manufacture our accessories for ferrite cores. In order to counter any cost increase due to this situation, EPCOS is supplementing the German production site by another one for the affected types.

The affected types will be marked with an extended ordering code and the origin designation as shown in the above list. This country of origin is being added to the current designation *Made in Germany*. The products from both countries of origin are identical in technical terms.

Availability

Until further notice, these products will be supplied in parallel from both production sites. They can be distinguished by the extended ordering code and the designation of the country of origin on the product packaging label. Samples are available upon request.

Pricing

This measure assures price stability for the products concerned.
