284-913	FN 284E- 2 -06		
284-914	FN 284E- 4 -06		

Description:

On FN 280 series with dual fuse version the labeling will be changed from ink print to labeling. The labeling solves some problems we had with printing before and improves the marking quality. See below:

Printing

Printing

Labeling

Labeling

Identification:

by date code and by new label

Release date of introduction:

Mid. October 2007

Impact for the customer:

No change in function, quality, reliability or processability.

Quality assurance measures:

The factory in Lampun, Thailand is ISO 14001 and ISO 9001:2000 certified and producing same quality as before.

Customer feedback:

Please inform your customers in advance about this change. If we do not receive notification on the contrary within a period of 4 weeks, Schaffner EMV assumes that the customer agrees to the change.

Others:

FS products based on new FN282, FN284; FN286 design are also affected by this change.
