

Dear Ladies and Gentlemen,

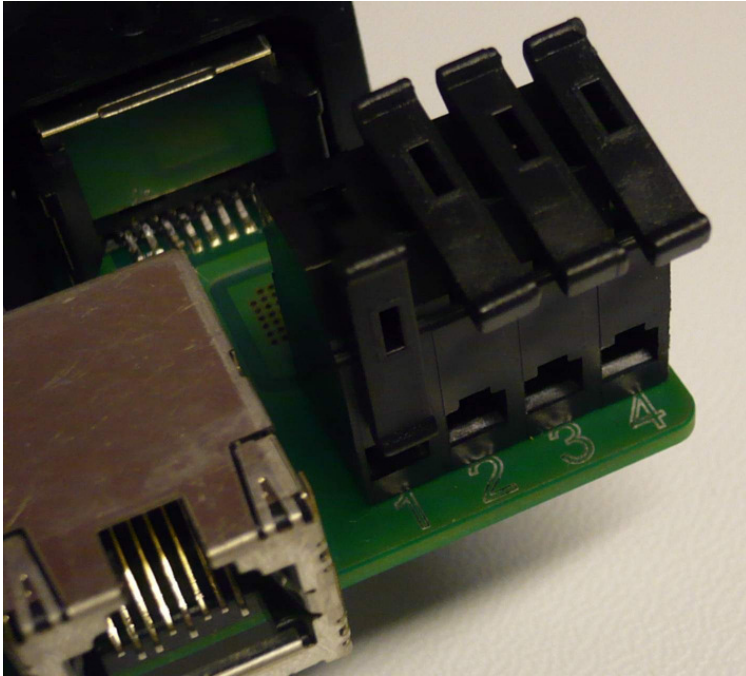

old version of 0945 225 1300

new version of 0945 225 1300

The new version has the following advantages compared with the old version:

- Reduction of the dimension of the PCB inside the switch cabinet
- No sharp edges at the PCB
- Very easy connection of the power wires with new type of screws less PCB terminal with reduced handling force to open and close the cage clamps at the terminal
- Better marking of the power terminals

Detail: new PCB terminal for power connection – low handling force and tool-less connection terminal and better marking of the terminals

The new version of the PCB is used inside the following the Han 3A RJ45 Hybrid panel feed through sets:

- 09 45 225 1300 (plastic version)
- 10 12 005 1004 (metal version)
- 09 45 545 1133 (PCB as spare part)

The part number will not change and the main technical specifications are given in the catalogue. There is no negative influence to the customer's applications or the pricing.

The implementation will start in May 2009. During the change period mixed deliveries could be possible. The exact date of changing depends on the sales volume.

Kind regards

Doreen Sanderson
