Migration GTO M2M products from European R&TTE to RED Directive completed

Dear valuable customer,

GTO M2M would like to inform that migration of GTO M2M products to new European Radio Equipment Directive (RED) 2014/53/EU which is needed from **13th of June 2017** is successfully completed.

As mentioned in previous Product Change Notifications (PCNs) no product change is needed (GTO equality document "2017_03_equality_decalartion_rte_red.pdf" is available under "Extranet") and only the additional number at the CE mark on the module shielding and on the CE mark on the packaging will disappear.

Example:

CE 0682

Example new:

CE

As mentioned in previous PCNs for interims time modules with additional number and modules without additional number at CE mark are possible, which also means in exceptional cases in one delivery package. Please inform all involved parties about that very minor change without any functional impact.

Further information can be found under: Extranet.../z_Approval_REACH_RoHS_ConflictMineral_RED/RED"

With best regards

Gemalto M2M GmbH
