Notice of Change in Insulation Material (Polyamide Resin) for DF3 and DF13 Series Connectors and Request for Your Acknowledgement

Hirose would like to take this opportunity to thank you sincerely for your support, and we hope this letter finds you well and prosperous.

We are writing today to inform you that we will change materials, etc., in board-to-wire connectors, DF3 and DF13 series for the following reasons.

We sincerely apologize for any inconvenience this may cause.

We request that you kindly offer your consent to this matter.

1. Products Affected

■ DF3 Series

DF3(D)Z-●P-2V(**)

DF3(D)Z-●P-2H(**)

● = Number of pins (2-15)

** = Specification number (The change applies to the connectors of all specification numbers.)

■ DF13 Series

DF13 (A)-●DP-1.25V(**)

● = Number of pins (10, 20, 30, 40)

** = Specification number (The change applies to the connectors of all specification numbers.)

Names of Products Before and After the Change (Representative Products)

	Current Products	Products after the Change
DF3 Series with a boss	DF3Z-●P-2V(**) DF3Z-●P-2H(**)	DF3E-●P-2V(**) DF3E-●P-2H(**)
DF3 Series without a boss	DF3DZ-●P-2V(**) DF3DZ-●P-2H(**)	DF3EA-●P-2V(**) DF3EA-●P-2H(**)
DF13 Series with a boss	DF13-●DP-1.25V(**)	DF13E-●DP-1.25V(**)
DF13 Series without a boss	DF13A-●DP-1.25V(**)	DF13EA-●DP-1.25V(**)

* See Attachment 1 "List of Names of Products Before and After the Change" for product details.

2. Description of Change

We will change the manufacturers and grades of insulation materials as shown in the table below.

Products	Change Part	Description of Change	Before change	After change
DF3, DF13	Insulation case	Insulation material manufacturer	DSM Japan	Kuraray Co., Ltd.
		Manufacturer's part number (grade)	TS250F6D (PA46)	GN2330 (PA9T)
		Flame-resistant grade	UL94V-0	UL94V-0
DF13	Absorption cap	Insulation material manufacturer	Mitsui Chemicals, Inc.	Kuraray Co., Ltd.
		Manufacturer's part number (grade)	CH230N(PA6T)	GN2330 (PA9T)
		Flame-resistant grade	UL94V-0	UL94V-0

3. Reason for Change

We will change to materials with low water-absorbing property to suppress resin blisters which may occur at the time of reflow.

- Comparison of water absorption rates before and after the change (Material's physical property value)

Part	Before change	After change
Insulation case	1.5% (*1)	1.0% (*2)
Absorption cap	2.2% (*2)	1.0% (*2)

(*1) Humidity control condition: 23°C × 50%RH

(*2) Humidity control condition: 40°C × 95%RH

4. Differences Resulting from the Change

- (1) Change in the color tone of the insulation material

The color tone will be slightly different after change.

Before change

After change

(the color will become darker)

* The product in the above picture is a DF3 series product (H type).

The color tone of the products after the change will be as shown in the above picture.

(2) Change in product form

The forms of products will slightly change.
See Attachment 2 "Description of Change of Product Form."

(3) Discontinuation of sales of products using moisture-proof packaging with silica gel

Since materials with a low water-absorbing property will be used after the change, we will discontinue the sales of products using the above packaging specification.

(4) Difference in functions

We will guarantee the product specification no different from the existing products for the products after change.

- 1) Counterpart mating connectors can be used as usual after the change of insulation material of the products.
- 2) The insulation material of counterpart mating connectors will not be changed.
- 3) Although the products after the change satisfy the RoHS directive, inclusions of chemical substances, etc., have changed. Please contact a Hirose sales representative concerning green procurement.

5. Schedule of Implementation of Change

- | | |
|---|------------------|
| (1) Last date for receiving orders for the current products | July 30, 2016 |
| (2) Start date for receiving orders for the new products | August 1, 2016 |
| (3) Last shipping date for the current products | January 31, 2017 |

6. Confirmation of Your Acknowledgement

We kindly request that you let a Hirose account representative know you acknowledge this matter by July 20, 2016. In the absence of a response by this date, please be advised that you will be delivered products that have been changed as described above. If you should have any questions, please feel free to contact a Hirose account representative.

■ Description of form change of DF3 series connectors

1. Addition of round shapes and wider opening will make housing's break-resistant property against load at the time of tilted insertion even.

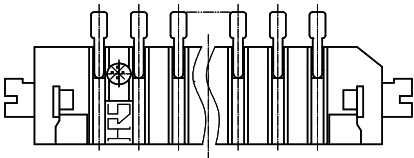

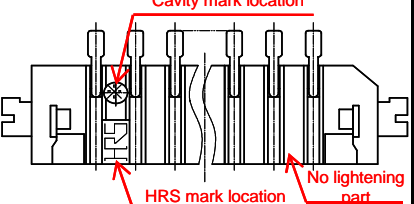

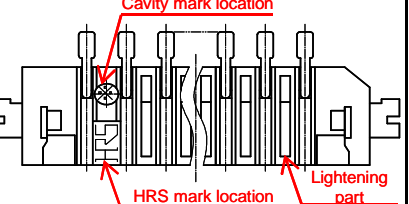

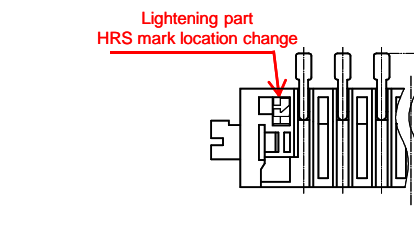

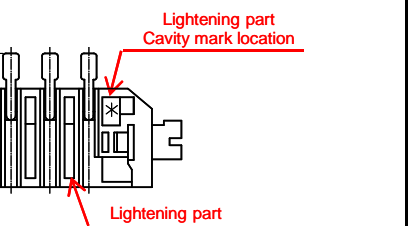

Unit: mm

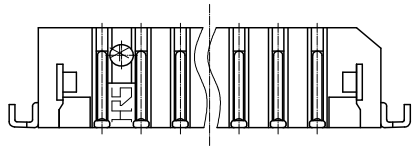

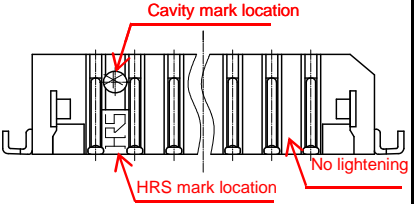

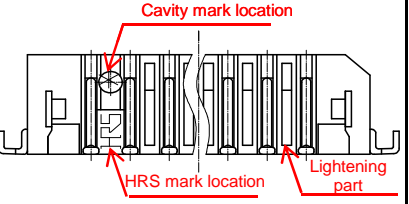

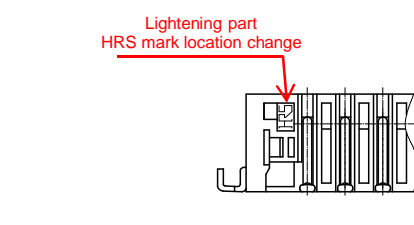

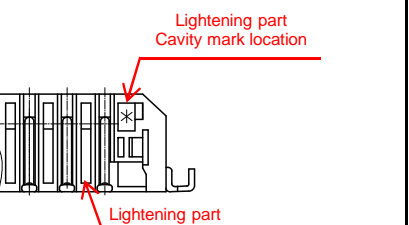

# of pins	Before change		After change	
	Dimension A	Dimension B	Dimension A	Dimension B
2	6.5	1.05	6.5	1.75
3	8.5	3.05	8.5	3.75
4	10.5	5.05	10.5	5.75
5	12.5	7.05	12.5	7.75
6	14.5	9.05	14.5	9.75
7	16.5	11.05	16.5	11.75
8	18.5	13.05	18.5	13.75
9	20.5	15.05	20.5	15.75
10	22.5	17.05	22.5	17.75
11	24.5	19.05	24.5	19.75
12	26.5	21.05	26.5	21.75
13	28.5	23.05	28.5	23.75
14	30.5	25.05	30.5	25.75
15	32.5	27.05	32.5	27.75

2. We will achieve molding stability by adding lightening parts to make the thickness of the resin more even. There will be no change in the recommended PCB pattern drawing.

< DF3 Series (V type) >

	2 to 6 pins	7 to 10 pins	11 to 15 pins
Before change	 <p>DF3 Series (V type) bottom face</p>		
After change			
Difference	No difference	<ul style="list-style-type: none"> • Lightening parts added • HRS/cavity mark location change 	<ul style="list-style-type: none"> • Lightening parts added • HRS/cavity mark location change

< DF3 series (H type) >

	2 to 6 pins	7 to 10 pins	11 to 15 pins
Before change	 <p>DF3 series (H type) back face</p>		
After change			
Difference	No difference	<ul style="list-style-type: none"> • Lightening parts added • HRS/cavity mark location change 	<ul style="list-style-type: none"> • Lightening parts added • HRS/cavity mark location change

3. We will change the form of the lock to suppress the scraping of the lock at the time of extraction.

* The drawings show a V type connector. The form of the lock in H type connectors will be changed similarly.

■ Description of form change in DF13 series connectors

- We will change the form of the lock to suppress the scraping of the lock at the time of extraction.

Acknowledgment

(Customer -> Hirose Electric business representative)

Notice of Change in Insulation Material (Polyamide Resin) for DF3 and DF13 Series Connectors and Request for Your Acknowledgement

We acknowledge the aforementioned matter.
