

16 August 2022

Dear Customer

We have been notified by HOPERF that they are having to discontinue their RFM01 (receiver) and RFM02 (transmitter) modules with immediate effect. This is due to the sudden announcement from their chip supplier that the chipset used with each module has become End of Life.

There's still an opportunity to place a last time buy with the date set as 22nd August 2022.

The following frequency types within each series are affected by this discontinuation:

Module Series	Type
RFM01	433/868/915D
RFM01	315/433/868/915S1
RFM01	433/868/915S2
RFM02	433/868/915D
RFM02	433/868/915S1
RFM02	433/868/915S2

There are no direct replacements from HOPERF, however, there are form and function alternative series RFM219B (receiver) and RFM119B (transmitter) available. Contact our sales desk with your requirement for these.

Attached are data sheets of the old and new series for reference.

Please make the relevant person(s) in your organisation aware of this change.

Yours Sincerely

Anglia
