

Product Discontinuation Notice

To: All concerned
 From: Ignacio Alava
 Date: March 13th, 2024
 No. of pages 1
 PCN-Ref. No.: Plastic parts colour options / streamlining plastic parts offering

As part of our ongoing efforts to streamline our production processes and enhance the overall efficiency of our operations, we have made the decision to adjust our accessory offerings.

After careful consideration and evaluation, we have identified certain accessory colour options in our part number building instructions that are not aligning with our strategic objectives. Therefore, we will be discontinuing these from our offering.

Effective immediately, rotor colour cannot be selected, and knob / shafts / thumbwheels will have a limited number of colours available as follows:

	Affected series	Available colour selections
Carbon potentiometers	PT-6, PT-10, PT-15, ST-15, STS-15, SM-15	Natural (not coloured) Cream Black
Cermet potentiometers	PTC-10, PTC-15, SMC-15	Cream Black

* Other colour items may be shipped until existing stock is finished.

This change will allow us to focus on core products and invest resources in developing even better options for you in the future.

I thank you in advance for your kind cooperation and remain at your disposition for any further information you might require.

Sincerely,

Ignacio Alava
Commercial & BD director
