Description of obsolescence: Production of RN73 (RN73S, RN73W) products will cease

Reason for the obsolescence: We have been informed by the raw material manufacturer that the production of the protective coating resin used in the target product will be discontinued. We examined alternative materials but decided that it would be difficult to consider alternative materials because they are custom-made and are produced in small quantities. In addition, we have decided to discontinue the production of the target product RN73 series because **we have a lineup of RN73R and RN73H series as products with improved reliability of the target product.**

Effective Date of the obsolescence: 31st March 2023
Last time buy: 30th September 2022
